PROFILE

I'm a self-taught front-end developer based in Warsaw. Passionate about crafting seamless user experiences, I specialize in building dynamic and responsive web applications using the powerful combination of React and TypeScript. With a keen eye for design and a commitment to code quality, I bring innovation to life in the digital realm.

EMPLOYMENT HISTORY

Frontend developer, Dathuis
Amsterdam

Apr 2021 — Present

- Engineered and maintained an automated platform tailored for real estate professionals using React and Typescript.
- Defined a thematic approach to ensure a consistent visual identity across the entire website, actively contributing to the process.
- Led initiatives to streamline user onboarding, encompassing research, planning, ticket creation, and feature implementation for a seamless joining experience on our platform.
- Actively explored and proposed ideas aimed at optimizing code efficiency, both in the immediate context and for sustained performance gains over time.
- Collaborated closely with backend developers to integrate frontend components with RESTful APIs, ensuring seamless communication between the frontend and backend systems.
- Proactively engaged in daily stand-up meetings and sprint planning sessions to enhance cross-functional collaboration and improve overall development efficiency.
- Implemented comprehensive unit tests using Jest and React Testing Library, significantly reducing the number of post-deployment issues.
- Conducted regular code reviews to ensure adherence to coding standards, enhance code quality, and facilitate knowledge sharing among team members.

Frontend Developer, Freelance
Minsk

Oct 2020 — Apr 2021

- Creating responsive design and cross-browser compatible websites using HTML/CSS/Javascript.
- Collaborating with designers and developers using Git, Trello, Figma.
- Creating web applications based on a design using React, TypeScript.
